

Review of Deep Learning Seminar Paper

Reviewer: *Yahia Mesharaf*

Paper Writer: *Asadujaman Nur*

Overall, I find the paper well-organized with a clear flow of ideas. The usage of figures was very good in clarifying the written concepts. Nevertheless, there's still room for improvement.

What I liked:

- The overall paper organization
- Usage of figures
- Flow of ideas
- Simplification of the concept by breaking it down into parts
- Detailed explanation of the topic

What I felt it can be done better/differently:

- Punctuation Errors (better usage of commas & dots, capital letter after a dot, a space after a comma, small letter after a comma, etc.)
- Improving the sources used (more books/academic papers & less youtube videos)
- Putting the "Advantages & Disadvantages" part in the main body instead of putting it in the conclusion
- Mentioning a bit more clearly what exact role Dimensional Reduction will play in the future AI applications in the "Future of Dimensional Reduction" section
- Removing unnecessary headers/footers/subtitles like those

*Note: Sub-titles are not captured in Xplore and should not be used
